5 Benefits to Using AutoCONFIG Software in Flow Measurement and Control

1 Control
15+ functions from single valve control to station control.

2 Configurability
Customizable and pre-designed screens, copy/paste configurations and categories create a user-friendly experience that saves time and simplifies the dashboard.

Categories:
- I/O
- Calculations
- Communications

## 3 Convenience
Easily operates on latest platforms.

4 Offline access
Gain access to data and modify configurations without a physical instrument present.

5 Standardization
A single program for all active instruments.
